

Child Care Health Consultation Work Group Meeting Summary Wednesday, June 25, 2014 from 1:30-3:30pm

Attendees:

Carol Timm, Tiffany Mullison, Diane Kvasnicka, Dipti Dev, and, Pat Urzedowski

Welcome & Introductions

Diane welcomed members to the meeting.

Review Meeting Summary from April 30, 2014

The group reviewed the meeting summary and accepted the summary as presented.

Updates & Sharing

- Nutrition and Physical Activity Self-Assessment for Child Care [NAP SACC] – Dipti Dev
Dipti shared that NAP SACC will be part of the QRIS training in Nebraska. There were challenges with past data collection and evaluation which resulted in limited measures of impact. UNL Cooperative Education is developing a website to improve the evaluation. The website will allow child care directors to view 'snap shot' data electronically and auto generate reports. Orientation videos are also housed on the website. Paper copies of 150 evaluations already completed will be entered on line for evaluation. A preliminary report will be available December 2014. Family Child Cares who completed the process and were in good standing with licensing received a stipend.
- LLCHD, Gina and Renae – to be rescheduled. Some of the materials they have disseminated to child care staff were passed around to those in attendance. There is limited understanding on the difference between bleaching, disinfecting, and sanitizing surfaces in the child care setting. LLCHD has developed materials and also pumps to install on bleach bottles to ensure proper levels of bleach are being used.
- PEP Project, Mary Balluff – to be rescheduled.
- Step Up to Quality – Diane Kvasnicka shared the Step Up to Quality initiative begins on July 1, 2014. Staff are busy recruiting coaches and raters, training new staff, and preparing for orientations in Lincoln and Omaha.
- ECICC report – Diane Kvasnicka shared the report is in draft stage. The report will be presented to the Governor, as is required by statute.

Work Plan Updates

- Toxic Stress Focus – conversation focused on the CCHC work group building a case for CCHC to be placed at local health departments across the state. One step may be to participate in one of the “Director’s Conferences” and ask about interests and barriers to having CCHC as staff of local health departments.

Meeting Information for 2014

Meetings are scheduled for the last Wednesday of every other month at the NDOE: August 27, October 29, and December 17 [note December date change due to holidays]. Those in attendance noted summer meeting are a challenge and to consider cancelling a summer meeting.
